

Renaud Lapoële

Senior Front-End & Product Engineer

TypeScript | React | UX | Technical Leadership

Summary

Senior Front-End and Product Engineer with extensive experience turning complex business requirements into clear, accessible, and scalable web applications. Deep expertise in front-end architecture, TypeScript, React, and UX, combined with product ownership and technical leadership on global enterprise platforms. Comfortable working across APIs, Node.js, and broader system concerns, with particular depth in front-end engineering, usability, and accessibility.

Work Experience

Founder – Independent Product Development

YunikApps | France

05/2024 – Present

- Founded YunikApps to build independent web products and provide selected pro bono guidance on web, UX, and product development.
- Building the Product Engineering Workbench, an AI-assisted, document-first product specification tool.
- Delivering modern web projects with TypeScript, Astro, React, SolidJS, Tailwind CSS, and Node.js.
- Strengthened accessibility practice through Access42 training and certification, applying WCAG guidance in hands-on implementation.

Senior Front-End Engineer / Tech Lead / Product Owner

Cisco Systems | France

07/2019 – 05/2024

- Led the UX redesign and front-end delivery of two global Cisco partner search platforms, creating a more consistent experience across regions.
- Facilitated discovery and scoping workshops with business stakeholders across Cisco organizations, translating needs into estimates, epics, user stories, and delivery priorities.
- Defined UI architecture and front-end standards across React, JavaScript, HTML, CSS, and Tailwind CSS.
- Designed and shipped scalable web APIs supporting partner incentive program management.
- Scoped and assessed the technical feasibility of a Salesforce migration for direct partner contract management, aligning requirements and delivery plans with business stakeholders.
- Mentored a junior Product Owner in backlog management, user story creation, prioritization techniques, and effective stakeholder communication.

Work Experience

UX Lead / Front-End Engineer

Cisco Systems | France

08/2016 – 06/2019

- Introduced user-centered UI and UX practices across multiple delivery teams and throughout the development lifecycle.
- Translated business and user needs into wireframes, mockups, interactive prototypes, and customer journey maps.
- Designed complex AngularJS interfaces and a business intelligence dashboard, balancing data density with usability.
- Built Vue.js prototypes to test concepts and support Minimum Viable Product (MVP) decisions before full implementation.

IT Analyst / Technical Lead

Cisco Systems | France

03/2008 – 07/2016

- Facilitated requirements workshops for Global Deal Registration, a strategic global pricing and discounting initiative, translating stakeholder needs into scoped requirements.
- Designed user interfaces aligned with business processes and user needs, improving usability and IT-business alignment.
- Produced technical specifications, functional documentation, and user manuals while coordinating small delivery teams as technical or project lead.

Software Engineer

Cisco Systems | San Jose, USA

02/2007 – 02/2008

- Contributed to the Partner Deal Registration platform by managing requirements, technical specifications, UI design, and localization efforts.

Software Engineer

Cisco Systems | France

03/1998 – 01/2007

- Developed, implemented, and maintained web applications supporting logistics, marketing, e-learning, finance, and channel teams across the EMEA region.

Earlier Technical Roles

Nantes University, Hegler France, and Celia | France

1994 – 1997

- Provided technical support, created web pages, administered systems, designed databases, and developed Microsoft Access applications.
