Renaud Lapoële

Senior Front-End Engineer

React & TypeScript | Product, UX & Accessibility | AI-Assisted Development

Summary

Senior Front-End Engineer with 25+ years across software engineering, UX, and product delivery. I build clear, accessible web applications with React and TypeScript, with experience in APIs, product ownership, and technical leadership. I use Codex from discovery through testing and deployment, reviewing outputs and retaining responsibility for technical decisions and delivery.

Work Experience

Founder - Independent Software & Product Development

YunikApps | France

05/2024 - Present

- Developed and deployed Video Session Builder, a recruitment exercise with responsive React interfaces, search, server-side API integration, and persistent local drafts.
- Built and deployed AgentFlow Live, a NestJS/RxJS and Astro/React workflow simulation with real-time tracking, reconnect recovery, and automated tests.
- Developed reusable AI-agent workflows for project collaboration and front-end implementation: context, scoped increments, review, verification, and handoffs.
- Used Codex across design, implementation, testing, and deployment, challenging proposals, reviewing code, and testing manually in browsers.
- Continued Product Engineering Workbench development, applied Access42 accessibility training and certification, and provided occasional pro bono guidance.

Senior Front-End Engineer / Tech Lead / Product Owner

Cisco Systems | France

07/2019 - 05/2024

- Partnered with designers on the UX redesign and led the front-end implementation of two global Cisco partner-search platforms.
- Defined UI architecture and front-end practices using React, JavaScript, HTML, CSS, and Tailwind CSS.
- Owned backlog, epics, user stories, priorities, and stakeholder alignment as Tech Lead and Product Owner while remaining hands-on with development.
- Designed and delivered scalable web APIs supporting partner incentive program management.
- Acted as Product Owner for direct partner contract management as part of an application portfolio migration to Salesforce.
- Mentored a junior Product Owner on backlog management, prioritisation, user stories, and stakeholder communication.

Skills

Front-End

React, TypeScript, JavaScript, Astro, Component Architecture, Design Systems, HTML, CSS, Tailwind CSS, Responsive UI

Product & UX

Discovery, UX/UI, Prototyping, Requirements Analysis, Backlog Ownership, User Stories

Backend & Data

Node.js, NestJS, Web APIs; earlier experience with Java, SQL, PL/SQL, and Oracle

Delivery & Quality

Technical Leadership, Git, CI/CD, Vitest, Playwright, Manual Browser Testing

AI-Assisted Development

Codex, Agent Instructions, Project Context, Scoped Increments, Review & Verification

Accessibility

Accessible UI, WCAG / RGAA Practices, Keyboard & Focus Management

Languages

French (Native)

English (Fluent)

Spanish (Basic)

Work Experience

UX Lead / Front-End Engineer
Cisco Systems | France
08/2016 - 06/2019

- Introduced user-centered UI and UX practices across multiple delivery teams and throughout the development lifecycle.
- Translated business and user needs into wireframes, mockups, interactive prototypes, and customer journey maps.
- Designed complex AngularJS interfaces and a business intelligence dashboard, balancing data density with usability.
- Built Vue.js prototypes to test concepts and support Minimum Viable Product (MVP) decisions before full implementation.

IT Analyst / Technical Lead
Cisco Systems | France
03/2008 - 07/2016

- Facilitated requirements workshops for Global Deal Registration, a strategic global pricing and discounting initiative, translating stakeholder needs into scoped requirements.
- Designed user interfaces aligned with business processes and user needs, improving usability and IT-business alignment.
- Produced technical specifications, functional documentation, and user manuals while coordinating small delivery teams as technical or project lead.

Software Engineer
Cisco Systems | San Jose, USA
02/2007 - 02/2008

- Contributed to the Partner Deal Registration platform by managing requirements, technical specifications, UI design, and localization efforts.

Software Engineer
Cisco Systems | France
03/1998 - 01/2007

- Developed and maintained web applications across front-end and backend layers with Java, JavaScript, and Oracle for EMEA business teams.

Earlier Technical Roles
Nantes University, Hegler France, and Celia | France
1994 - 1997

- Provided technical support, created web pages, administered systems, designed databases, and developed Microsoft Access applications.

Education

Maîtrise, Computer Science & Software Engineering
Nantes University

Licence, Computer Science & Software Engineering
Nantes University

DUT, Computer Science & Software Engineering
Nantes University

Certificates

Accessibility: "Développer des sites web accessibles et conformes au RGAA"
Access42
10/2024
