

Renaud Lapoële

Senior Front-End Engineer who turns complex business workflows into clear, accessible, product-focused web applications.

I bring 25+ years building enterprise web applications, including front-end leadership, UX, and product ownership at Cisco. I led the UX redesign and front-end implementation of two global partner-search platforms. Hands-on from discovery through front-end architecture and delivery, I am suited to senior individual-contributor and front-end technical-lead roles.

EXPERIENCE

YunikApps - Founder — Independent Product Development May 2024 - Present
France

Founded YunikApps, a French micro-enterprise, as a vehicle for independent product development, professional practice, and occasional pro bono consulting.

- Developing the Product Engineering Workbench, an AI-assisted, document-first product-specification project.
- Building modern web projects with TypeScript, Astro, React, SolidJS, Tailwind CSS, and Node.js.
- Providing occasional pro bono advice on web, UX, and product-development topics.
- Strengthening accessibility practice through Access42 training/certification and hands-on WCAG-focused implementation.

POSITIONING

Senior front-end individual contributor with product ownership and UX leadership depth. Strong fit for product-facing engineering roles where clarity, delivery ownership, and usability matter.

Cisco Systems - Senior Front-End Engineer /
Tech Lead / Product Owner

Jul 2019 - May 2024
France - Remote

Senior IC role combining front-end leadership, UX design, and product ownership on global partner platforms.

- Led the UX redesign and front-end implementation of two worldwide Cisco partner search platforms, improving consistency and usability across regions.
- Owned backlog, epics, user stories, priorities, and stakeholder alignment while remaining hands-on with front-end development.
- Drove UI architecture and front-end best practices using React, JavaScript, HTML, CSS, and Tailwind CSS.
- Designed and delivered scalable web APIs for partner incentive program management.
- Acted as Product Owner on a Salesforce migration for a direct partner contract management solution.
- Mentored a junior Product Owner on backlog management, user stories, prioritization, and stakeholder communication.

Cisco Systems - UX Lead / Front-End Engineer

Aug 2016 - Jun 2019
France - Remote

Front-End engineer with a strong UX leadership role, focused on improving usability, consistency, and product clarity.

- Promoted UI and UX practices across teams, embedding user-centered thinking into delivery.
- Designed and redesigned experiences through wireframes, mockups, prototypes, and journey maps.
- Implemented complex interfaces with AngularJS / Angular and contributed to a business intelligence dashboard balancing data density with usability.
- Rapidly prototyped concepts with Vue.js to validate ideas and support MVP initiatives.
- Collaborated with product owners, analysts, and developers in Lean and Agile environments.

CORE SKILLS

FRONT-END

JavaScript, TypeScript, React, SolidJS, Vue.js, Angular, HTML, CSS, Tailwind CSS, responsive UI, UI architecture.

UX & PRODUCT

UX/UI design, wireframing, prototyping, journey maps, product discovery, backlog ownership, user stories, stakeholder alignment.

ENGINEERING

Node.js, web APIs, Java, SQL, PL/SQL, Oracle technologies, technical documentation, requirements analysis.

CURRENT FOCUS

Accessibility, inclusive design, WCAG compliance, Astro, AI-assisted development, AI engineering practice.

CERTIFICATION

Access 42 - Accessibility

October 2024 - Develop accessible sites and web applications

EDUCATION

Maîtrise, Computer Science & Software Engineering

Nantes University - 1996

Licence, Computer Science & Software Engineering

Nantes University - 1995

DUT, Computer Science & Software Engineering

Nantes University - 1994

LANGUAGES

French - Native

English - Fluent

Spanish - Basic

Hybrid role at the intersection of business analysis, UX design, and technical leadership.

- Gathered, analyzed, and documented requirements for worldwide partner management, pricing, and discounting initiatives.
- Designed user interfaces aligned with business processes and user needs, improving usability and business/IT alignment.
- Authored technical specifications, functional documentation, and user manuals.
- Coordinated small delivery teams as technical lead or project lead across multiple initiatives.
